

Our history

TECHNIMA, the French group based in Charente, has been designing, manufacturing and selling aerosol marking paints for more than 30 years.

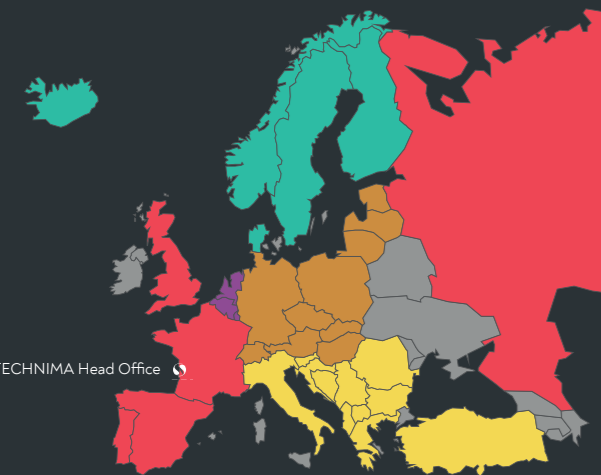

Its SOPPEC brand has become Europe's leading brand in this field for construction site marking, forest marking, industrial, technical and line marking paints.

More than any other manufacturer in Europe, the group has drawn on its ability to innovate, its technical expertise in formulation and product design, and its experience of industrial processes to ensure the satisfaction of its customers and distributors.

TECHNIMA has always driven growth through innovation with a significant investment in R&D, in order to provide formulas based on more efficient and eco-friendly components: the company designs and manufactures products that respect human health and the environment, and as such benefits from triple Quality, Safety and Environment certification.

TECHNIMA has a wide European footprint and exports also out of Europe. We serve our customers on their local grounds.

SOPPEC PureSPRAY™ The fastest system on the market

What can be expected from a floor marking solution? It should allow you to draw straight lines easily, with visible and durable marking that does not get dirty. It should also be quick, of course.

The SOPPEC PureSPRAY™ system guarantees you all of this! It combines 3 essential components:

- 1 The SOPPEC DRIVER™ trolley
- 2 The exclusive SOPPEC PureSPRAY™ concept
- 3 SOPPEC TRACING® PRO paint

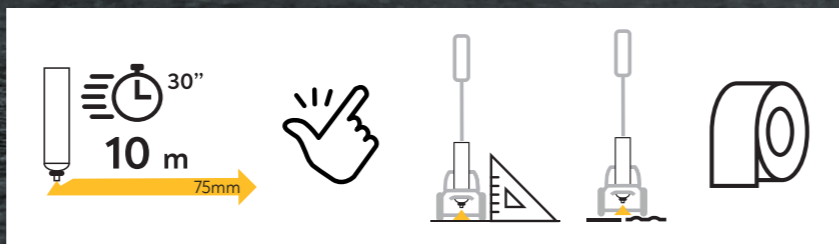

SOPPEC DRIVER™ trolley

Because there is no point in marking a nice line if it's not straight...

The best line marking trolley on the market thanks to its stability, simplicity and unique design. It provides you with a straight line on smooth or textured ground, indoors or outdoors.

The SOPPEC DRIVER™ trolley truly «steers» the user; it is compatible exclusively with SOPPEC TRACING® PRO aerosols and the PureSPRAY™ concept.

Made in France. 🇫🇷

- 1 Low, compact chassis designed for foolproof stability
- 2 Wheels with ball bearings that guarantee straightness of application on concrete or asphalt
- 3 Fore protected spraying area Fully adjustable marking width from 50 to 120 mm
- 4 Optimal seight of the marking area
- 5 Storage slot allowing 180m of marking autonomy for a 75mm wide line on smooth ground.

SOPPEC PureSPRAY™ SYSTEM

For neat and precise marking which does not require flanges to control the quality of the lines.

The SOPPEC PureSPRAY™ system combines the sum of SOPPEC's expertise in the field of aerosol marking paint. The combination of a unique formulation of resin, pigments and propellant, the exclusive design of the system «aerosol + application nozzle + trolley» secures a neat marking that does not require flanges to control the quality of the lines. The SOPPEC PureSPRAY™ system provides you with a fast and precise marking with no side-spray.

SOPPEC TRACING® PRO paint

Visible for a long time, it does not get dirty.

Its exclusive formula guarantees durable, high-contrast marking on all surfaces (concrete, asphalt, etc.). With just one product, it allows you to proceed with your markings outdoors as well as indoors, with exceptional quality and resistance to clogging.

Thanks to the SOPPEC PureSPRAY™ system, it guarantees a precise spray and a high flow rate over a longer distance than its competitors, and therefore allows you to carry out your task quicker and at a lower cost. Allows up to 90 m of a 75 mm wide marking on smooth surface. Made in France. 🇫🇷

New

SOPPEC DRIVER™

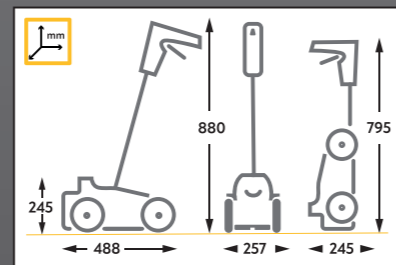

The central positioning of the tiller ensures a **high stability** and minimises the user interference during the application. The wheels with wide tread (32mm) and long wheelbase secure a **straight drive**.

Aerosol positioning is **intuitive**, thanks to the exclusive SOPPEC PureSPRAY™ nozzle cradle. The spraying zone is sheltered and optimized so as **not to disrupt the paint flow**. A wind shield (optional) further increases protection in challenging weather conditions. The compact shape allows marking up to **60 mm of a front obstacle** and **79 mm from a side obstacle**. **The line width is infinitely adjustable** from 5 to 12 cm.

The trolley set-up is done with **no tool**: screw the tiller back in its slot and adjust the aerosol holder position.

It can be **stowed away in an instant**: swing the trolley on the nose by using the handle and screw the tiller at the rear. The SOPPEC DRIVER™ trolley may be converted into an adhesive tape applicator.

(September 2021)

FEATURES

Polyethylene trolley. Epoxy powder coated steel aerosol holder and tiller arm. Ø 150 mm wheels with ball bearings. 3 years warranty. Made in France.

SOPPEC TRACING® PRO

Its exclusive formula, developed in our laboratory, guarantees exceptional performance:

- Better **resistance to clogging** than any of its closest competitors.
- Covering of up to **90m in 75mm wide line** with 1 aerosol at optimum speed and on smooth ground.
- Touch-dry in **11 minutes**, light traffic-ready in 60 minutes and in 24 hours for heavy traffic.
- **Brighthness, contrast, durability**, it is an industrial grade marking paint that withstands the most severe conditions (UV, solvents, pedestrian, car or forklift truck traffic) **indoors or outdoors**.
- **NSF certified** (food contact and storage).
- **Xylene-free**, and guaranteed without chlorinated solvents and aromatic compounds.

Includes the **exclusive, versatile and pre-mounted nozzle**, which can be used with the SOPPEC DRIVER™ trolley or by hand.

FEATURES

Binding: thermoplastic acrylic resin. Satin finish. Mineral and organic pigments free of heavy metals such as lead or cadmium. Aerosol containing 1000ml gross / **750ml net** delivered in boxes of 6 by colour. 7 colours available, identifiable by their coloured collar. Made in France.
